250(L) x 37(W) mm

Bamboo is the world's most versatile plant! It has a short growth cycle & can be harvested in 3-5 years.

Bamboo is a natural material made from the pulp of the bamboo grass.

Bamboo products have been growing in popularity due to their many unique properties...

Light & Strong

Antibacterial

Bamboo contains a unique anti-bacteria & bacteriostasis bio-agent called "Bamboo Kun". This substance is maintained in the finished bamboo products as it is bound tightly to the bamboo cellulose molecule.

High Tolerance

The brush handles are produced with high temperature & pressure carburization, enhancing its shape retention properties & durability.

Waterproof

Bamboo brush surface undergoes a special process to repel water & prevent oil absorption.

Wood Comb

Length: 245 mm

Rustic Vintage
• Used with Double Side Blades

W7922AWB
Length: 217 mm

Fading Brush

- Ergonomic Designed Handle for Comfort & Control
- Gently Removes Hair Debris for Clipper Fade Cuts
- Ideal for Sensitive Scalps
- Nylon Bristles

8213N
146(L) x 25(W) mm

Bio Degradable

Material

Love
The Earth

Bio
Degradable

Biodegradable Plastic is plastic that decomposes much quicker than synthetic counterparts that takes several hundred years. Exactly how long it will take to breakdown depends on various factors, such as temperature, & the amount of moisture present. Degrading is achieved when microorganisms in the environment metabolize & break down the structure of biodegradable plastic. The end result is one which is less harmful to the environment than traditional plastics.

Eco WW

A composition of recycled plastic, wood & bamboo shreds left from production. The idea is to reduce wastage & to reduce our reliance on new plastic resin. The end product is a bit heavier, & perhaps stronger than new plastic due to the wood & bamboo fibers. Due to the nature of the material, colors & marks may vary from product to product.
